

**Specialist Contractor in Rock Blasting,
Rock support and Slope Stabilization**

Kjell Foss is a nationwide contractor specializing in rock blasting and rock support. We provide services for both large and small projects across the country and are proud to be a reliable and trusted partner for both public and private clients.

Our headquarters are located in Re, Vestfold. We carry out projects nationwide and have offices in Troms, Nordland, Trøndelag, Møre og Romsdal, Vestland, and Eastern Norway.

We provide a wide range of services in rock drilling, rock blasting, and rock support, whether it involves drilling bolt holes, removing rock in a small garden, or larger-scale projects for infrastructure, industry, and quarries. Our services include:

Blasting work for

- Garages, cabins and residential plots
- Industry and quarries
- Road and railway projects
- Embankments, ports and power facilities

Rock Support / Slope Stabilization:

- Temporary rock safety measures
- Permanent rock stabilization
- Installation of ice and rockfall nets
- Rock bolting
- Installation of safety fences
- Drilling and installation of micropiles

Rock Splitting

Hydraulic rock splitting without the use of explosives. Suitable for removing rock in, for example, basements or other areas where blasting would be too risky.

Our skilled and service-minded employees have great capacity and complete jobs quickly with short lead times!

Drilling Work For:

- Production, seam, and contour drilling
- Bolt hole drilling
- Core drilling
- Foundation drilling into rock

Wire Sawing

- Vibration-free
- Fully electric solution
- Leaves a smooth and even rock face
- Reduced environmental impact, noise, and dust

Workshop

Maintenance and repair of drill rigs and heavy machinery

About the Company

Kjell Foss AS was established in 1966 by Kjell Foss and is today a wholly family-owned company with over 100 employees and several subsidiaries and sister companies. With more than 60 years of experience in the industry, we have built a strong position as a leading provider of rock blasting, rock support, and drilling technology.

We are proud members of the Machine Contractors Association (MEF) and the Norwegian Mining Industry Association, and maintain close partnerships with leading suppliers and consultants in drilling, blasting, and rock support. This enables us to deliver high-quality, safe solutions – regardless of project size or complexity.

Kjell Foss AS is founded on values of quality, safety, and sustainability. We continuously invest in modern equipment, skills development, and health and safety management, and we are certified as an Eco-Lighthouse company. We place strong emphasis on recruitment and the continuation of our trade, taking in new apprentices annually across our companies.

Employees

Our most important asset is our people. Kjell Foss employs many experienced and skilled professionals with broad expertise in rock blasting and rock support.

We are committed to having the best specialists in the industry and continuously invest in skills development across all areas.

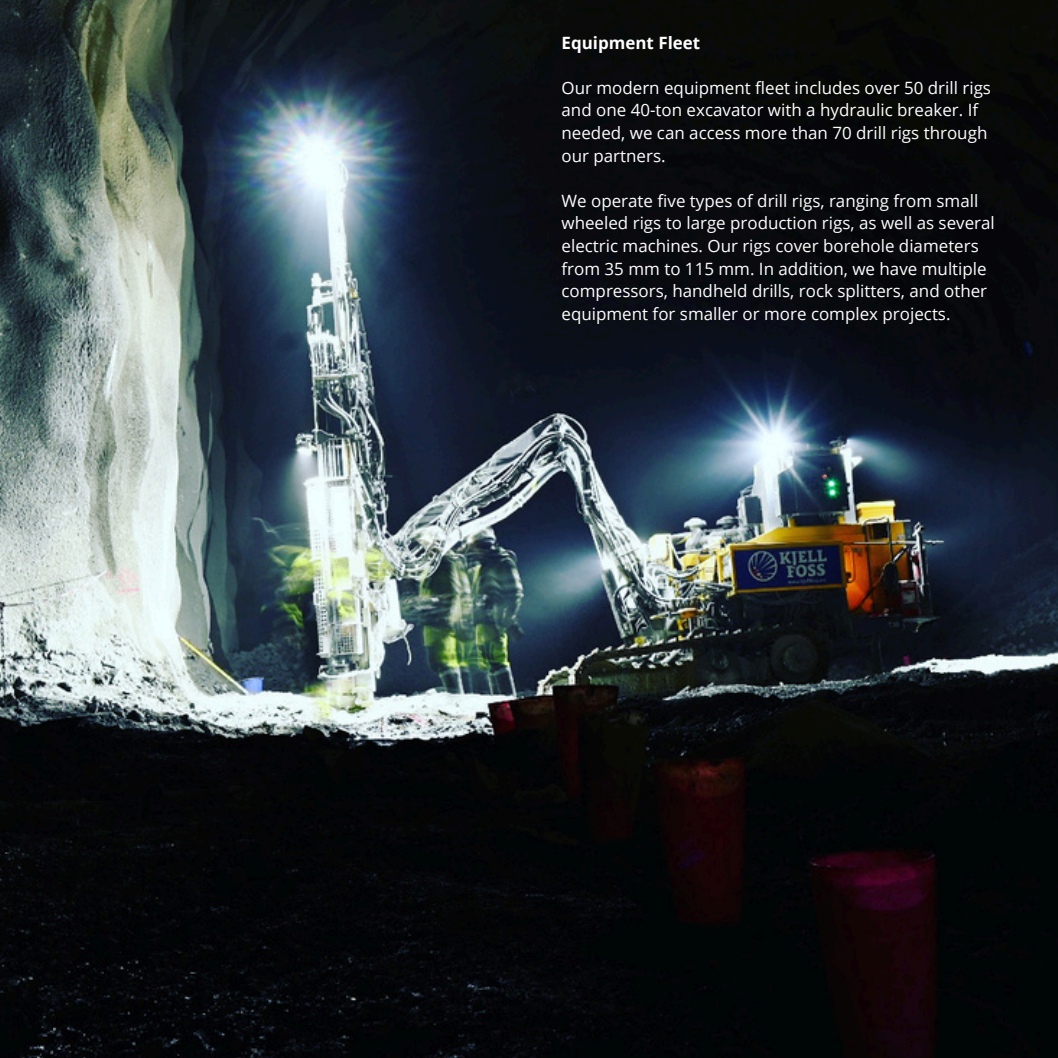

To ensure the continuation of our trade and support recruitment in the industry, we take in new apprentices annually across our companies.

Equipment Fleet

Our modern equipment fleet includes over 50 drill rigs and one 40-ton excavator with a hydraulic breaker. If needed, we can access more than 70 drill rigs through our partners.

We operate five types of drill rigs, ranging from small wheeled rigs to large production rigs, as well as several electric machines. Our rigs cover borehole diameters from 35 mm to 115 mm. In addition, we have multiple compressors, handheld drills, rock splitters, and other equipment for smaller or more complex projects.

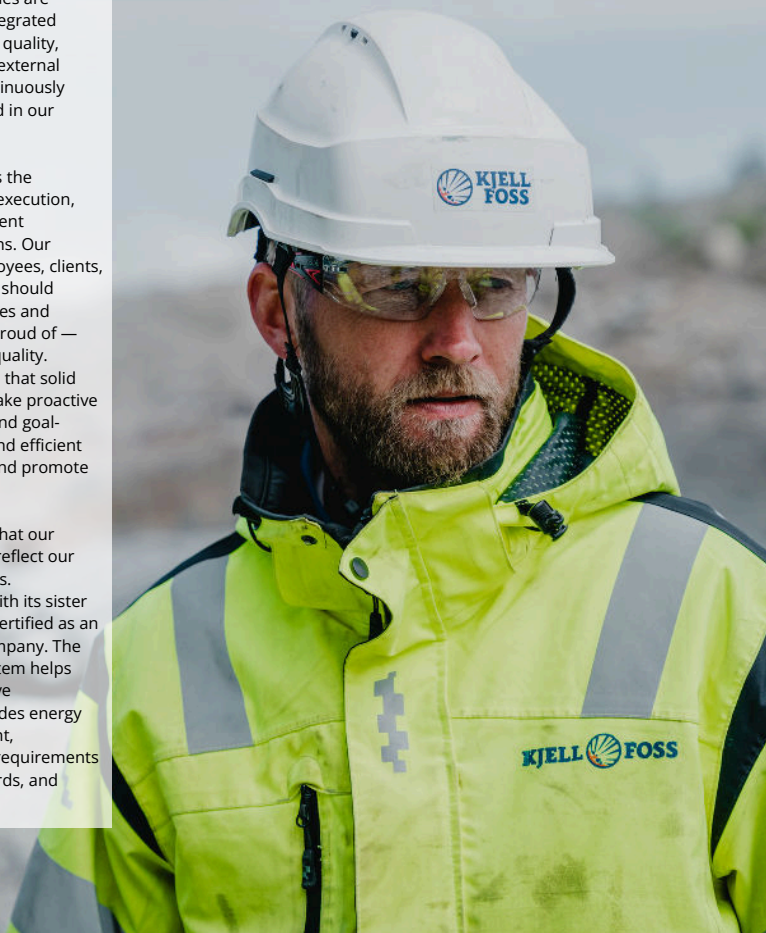

Quality, Health, Safety and Environment (QHSE)

We at Kjell Foss AS take great pride in our employees, our clients, and the equipment we use in our operations. These values are upheld through a unified and integrated management system that covers quality, health and safety (HSE), and the external environment. This system is continuously evolving and is fully implemented in our organization and culture.

The management system defines the requirements we set for project execution, combining internal standards, client expectations, and legal obligations. Our strong ambition is that our employees, clients, and the surrounding community should experience that we deliver services and products every day that we are proud of — with safety, efficiency, and high quality. At Kjell Foss AS, we firmly believe that solid HSE work is good business. We take proactive measures based on systematic and goal-oriented efforts to ensure safe and efficient workplaces, prevent accidents, and promote job satisfaction.

We work consistently to ensure that our reputation and daily operations reflect our values, our policies, and our goals. In 2019, Kjell Foss AS, together with its sister and subsidiary companies, was certified as an Eco-Lighthouse (Miljøfyrtårn) company. The environmental management system helps reduce the organization's negative environmental impact. This includes energy consumption, waste management, compliance with environmental requirements and regulations, supplier standards, and resource planning.
